

Best Bubbles Fluo

Micro leakage Fluo Detector

BEST BUBBLES FLUO is a quick and easy solution to identify leakage on refrigerator lines and components of refrigeration and air conditioning systems even in situations of poor visibility as it becomes fluorescent when exposed to a UV light.

Instructions: Dispense Best Bubbles Fluo in vicinity of the leak; thanks to its special formulation it sticks on surfaces ensuring the immediate identification of the leakage through the formation of a thick bubble that fluoresces, once illuminated by a UV light.

The product is not dangerous.
